Subject: Tier IV Procurement for Glycols

Rupert, Fred:

I need authorization if you still want me to set up Tier IV analytical services for glycols. The lab had limited capacity last week due to another/other short notice projects – most likely Cabot and/or PADEP split samples. But they said they could do 5-10 samples per day, but not with expedited TAT. They estimated they could do a 2-3 week TAT. They had a couple other TA labs that could do glycols, but they didn't do as many of the glycols as Buffalo and had higher detection limits.

I'm in the office this week, so the office # below is the best to contact me, if needed.
